

2015 InSite™ Reports Shifting Years

This guide provides an overview of when InSite reports shift years. The goal of this guide is to assist your organization with operational activities around the use of InSite reports (i.e. schedule time to archive reports before years shift, etc.). Also, please note:

- Changes occur after data refresh of the month reflected
- The Population Report and MWOV Report are updated on a rolling basis and do not shift

If you have any questions about these reports or InSite, please contact your local Optum Healthcare Advocate or Account Manager.

Reports	Notes
Reports that shift in January	
Top 30 Diagnosis Codes / Diabetes Summary	Diagnosis codes for 2013, 2014, 2015 DOS will be reported after January data refresh.
Central Suspect Identification (CSI)	Suspects for 2014 and 2015 DOS will show after the January data refresh.
Group and Provider Summary	Data for 2015 and 2016 PY will be reflected after the January data refresh.

Reports that shift in April	
Members with Declining RAF (MDR)	From January through March, decline in RAF for 2014 DOS will be evaluated. Decline in RAF for 2015 DOS will be evaluated after April data refresh due to the dependency of the build-up RAF which requires a large amount of data.
Patient Management	From January through March, RAF scores for 2013 / 2014 DOS will be reported. In April, the RAF scores will shift to 2014 / 2015 DOS. The shift is dependant on build-up RAF in April and is needed to accommodate a significant amount of data.
PCP RAF	From January through March, RAF scores for 2013 / 2014 DOS will be reported. In April, the RAF scores will shift to 2014 / 2015 DOS. The shift in April is needed to accommodate a significant amount of data.
Prevalence	From January through March, RAF scores for 2013 / 2014 DOS will be reported. In April, the RAF scores will shift to 2014 / 2015 DOS. The shift in April is needed to accommodate a significant amount of data.
Prevalence – Group / Plan PBP	From January through March, RAF scores for 2013 / 2014 DOS are considered. In April, the RAF scores will shift to 2014 / 2015 DOS. The shift in April is needed to accommodate a significant amount of data.
RAF – Group / Plan PBP	From January through March, RAF scores for 2013 / 2014 DOS are considered. In April, the RAF scores will shift to 2014 / 2015 DOS. The shift in April is needed to accommodate a significant amount of data.
