

Chronic Conditions Need a Yearly Evaluation

Correct coding requires that the immediate problem of the patient be evaluated, documented and coded. In addition, all conditions that affect the composite picture of the patient's health status need to be recorded at least once per year.

^{*}V12 HCC categories that do not map to the new V22 HCC model.

Due to the updated, clinically revised CMS-HCC Medicare risk adjustment model for Payment Year 2014, the bolding of ICD-9-CM codes has been revised to reflect:

- Red = Risk adjusts in only the 2013 CMS-HCC model
- Black = Risk adjusts in both the 2013 CMS-HCC model and the 2014 CMS-HCC model

Note: The 2014 Payment Year model is a blend of the 2013 CMS-HCC model (25%) and the 2014 CMS-HCC model (75%).

Optum does not warrant that this easy reference guide, supplied for informational purposes, is complete, accurate or free from defects; the ICD-9-CM code book is the authoritative reference. Records should reflect a practitioner's clinical "thought process," coding and documenting the status and treatment of all conditions affecting the patient to the most specific level. In 2013, CMS announced an "updated, clinically revised CMS-HCC risk adjustment model" that differs from the proposed model.
